

Is it time for an updated COVID booster?

- Adults **65 and older** can get a second dose of the updated vaccine **4 months** after their last dose.

- A child **6 to 11 years old** who got a booster on or after **October 12, 2022**.
- A child **12 years and older** or an adult who got a booster on or after **September 2, 2022**.

- Look on your Vaccination Record Card to see if you have a dose that says **“bivalent.”**
- Call the place where you had your last dose and ask them.
- Look on Massachusetts’ Vaccine Registry:
myvaxrecords.mass.gov

Now, people 6 years and older who have never been vaccinated for COVID-19 only need to get one dose!

Need information on vaccination for children 5 years and younger?
